

The Clean Blast Bottle Washing System

About the Clean Blast...

The Clean Blast is the long awaited answer to the bottle washer industry. This little compact unit will fit any location, and it is easy to use. Simply press down bottle to activate and release bottle to stop the spray. Because of its' heavy duty PVC structure, the Clean Blast can go in harsh environments where most bottle washers made of steel will not stand up, e.g. factories, agricultural settings, and high moisture locations etc.

Options:

1. Waste water and sump with auto level control.
2. Ozone generator from high purity applications.

Warranty:

The sturdy unit has a 10 year warranty on PVC housing and 1 year on the electrical parts.

Safety:

It comes with a unique safety feature that prevents the unit from operating until the jug is pushed down.

Service:

Parts are inexpensive and easy to replace.

Features:

High Pressure Clean Blast Action
High Flow Solenoid
Full Port 3/4" Inlet with Auto shut Off Valve
Heavy Duty PVC Structure
Slim Size Fits Anywhere 13" x 40"
(min. 60" clearance required to operate)

Made in Canada

POWERFUL • FAST • EFFICIENT
